

## Eagles Home Learning Tasks - Tuesday 24th March

Maths - If you **are not** in the below groups, your maths work has been set for you via Education City. Please log-in and complete the classwork city which has been set up for today. You can also go to [TTRS](#) and practice your time tables.

### Maths - for children in **green, yellow** and **white** groups

- Start by practicing your tables on [TTRS](#). Remember the school postcode is RG9 6PR.
- Then, head to [Education City](#) where a classwork city has been set up for you to complete. It contains some activities on ratio and proportion.

➡ **Reflect:** In Eagles class there are 7 boys and 13 girls. How would you express this as a ratio? How would you express it as a proportion?

### REMEMBER:

There is an **information sheet** on ratio and proportion, with fact file images and a link to a YouTube video introducing the concepts. You might want to look at these first - it is on the class page of the Frieth website.

### English - for **all** pupils

On Tuesdays you would usually be working on comprehension, so today's English home learning task is reading-based too!

- Head to [Education City](#) and complete today's English classwork city, which has been set up for you.
- Remember when completing the activities, if you get stuck, press the 'i' button to help you!

➡ Want something extra? You could spend some time reading aloud to a grown-up or sibling. Or there are some reading comprehension tasks in the CGP English guides.

### RE - for **all** pupils

Mrs Reid will be posting this separately.
