

Eagles Home Learning Tasks - Wednesday 1st April

Maths - If you **are not** in the below groups, your maths work has been set for you via Education City. Please log-in and complete the classwork city which has been set up for today. You can also go to [TTRS](#) and practice your time tables.

Maths - for children in **green, yellow** and **white** groups

- Start by practicing your tables on [TTRS](#). Remember the school postcode is RG9 6PR.
- If you didn't yesterday, have a watch of this video about [scale factors](#).
- Then, open the PowerPoint on scale factors that is underneath this pdf. Please complete the Reasoning and Problem Solving questions on slides 14-20.
- After that, can you have a go at some of the reasoning and problem solving questions from Classroom Secrets? I have attached them in a separate document.
Green group - Questions 1a-3b
Yellow group - Questions 4a - 6b
White group - Questions 7a -9b.
- The answers are on page 5 of the pdf document.

REMEMBER:

There is an **information sheet** on ratio and proportion, with fact file images and a link to a YouTube video introducing the concepts. You might want to look at these first - it is on the class page of the Frieth website.

English

On Wednesdays you would usually be working on grammar and punctuation, so today's English home learning task is grammar-based too!

- In your home learning packs there is a SATs Survival Practice Book 4: Punctuation. Your task for today is to spend some time working through the rest of your booklet. Remember to read the information first to help you!

- **IF THERE ISN'T** one of these workbooks in your pink folder, then head to [Education City](#) as a city has been created for you there with some grammar work for you to complete.

➡ If you want something extra, there are some grammar and punctuation tasks in the *CGP English guides*. Additionally, you could spend some more time practising the -ant and -ent words from the statutory spelling list; can you put them into sentences using the punctuation types you have practised today?

Computing - for all pupils

1. An amazing new species has been discovered recently, but in this current climate, reports on it have been minimal in the news.

For today's computing lesson, I'd like you to go to the following website to find out about this new, amazing creature!

<https://zapatopi.net/treeoctopus>

- Take some time to look at the website, particularly the 'about' and 'sightings' tabs.
 - Then have a think about what this amazing website and discovery teaches us? Share this with one of the grown-ups in your household!
2. If you would like something extra to do for Computing, then head to Espresso Coding.
 - Head to [Discovery Education](#) and log in to Espresso Coding.
 - Scroll down to 'Year 6 Starter Unit' and select.
 - Then choose 'Lesson 3'. Have a go at all 6 steps within Lesson 3. In each step there is an informational video to help you follow and complete the task.
 - Then complete 'Lesson 4' as well.
