

Eagles Home Learning Tasks - Monday 23rd March

Maths - If you **are not** in the below groups, your maths work has been set for you via Education City. Please log-in and complete the Classwork City which has been set up for today.

Maths - for children in **green, yellow** and **white** groups

- This week you are going to learn about **ratio and proportion**.
- There is an **information sheet** on ratio and proportion, with fact file images and a link to a YouTube video introducing the concepts. You might want to look at these first - it is on the class page of the Frieth website.
- Then, head to espresso and watch the three videos on ratio and proportion:

[espresso](#) - Key Stage 2 - Maths - Ratio and Proportion - videos

- Now go to the 'activities' section and complete the 'Quiz' followed by 'Be the Choreographer'.

➡ **Reflect:** How would you define ratio? How would you define proportion?
How did you get on with the quiz?

English - for **all** pupils

Monday would usually be our spelling day, so today's English home-learning task is spelling-based too!

- Head to [Education City](#) and complete today's English classwork city, which has been set up for you.
- Then look at the Year 5 and 6 statutory word list which is on the class page of the Frieth website. Can you identify the -ance/-ancy and -ence/-ency words on there? Do you know what they mean? Do they have any synonyms or antonyms? Practice spelling them, using methods which work best for you.

➡ Want something extra? You can try completing one of the 'Statutory word list' word searches on the class page. Or there are two spelling booklets in your packs to try.

Science - for all pupils

Head to [Education City](#) and complete today's Science classwork city, which has been set up for you.
