

Yew Tree Carpark

We have been thinking about how we can keep the road around our school clear of traffic and safe for our pupils. As part of this we are introducing Park and Stride. This will not only keep the school gates clear of congestion but also means pupils will be able to get active on their journey to school.

NEW PARK AND STRIDE LOCATION YEW TREE PUB CAR PARK

Active Travel What is active travel?

Walking, cycling, scooting, and Park & Stride are all excellent forms of active travel. They are all easy ways to increase daily physical activity and help maintain a healthy weight. Children who travel actively to school also gain valuable life skills such as road safety and, as they get older, learn to travel independently..

Park & Stride

Park & Stride is a scheme where parents/ carers park a short distance from school and walk the rest of the way. This is ideal for those who live too far away from school to walk or who need to continue their journey to work or another school. Next time you drive, try to park and stride from suitable places outside our walking zone and walk or scoot the rest of the way to school. You may even find it takes you less time than trying to find somewhere to park near the school gates.

'I love walking home with my mum and big sister and chatting about school'
